## 1. Uvod

### 1.1 Tema sajta

Tema sajta su online vesti. Korisnici mogu da čitaju vesti, i ostavljaju komentare nakon što se registruju i uloguju, kao i da obrišu svoje komentare. Kada uđu u neku od kategorija za vesti, mogu pretražiti vesti po nazivu. Korisnici sa ulogom editora imaju posebnu sekciju (editor) gde mogu menjati svoje objave – svaki editor može da menja samo svoje objave. Takođe mogu da brišu svoje objave i da prave nove.

Administrator u svojoj sekciji (admin) može da menja podatke bilo kod korisnika, briše korisnike i dodaje nove. Takođe može da upravlja kategorijama vesti, briše ih, menja i dodaje nove. Admin može da obriše svačiji komentar na objavama.

### 1.2. Korišćeni programski jezici

Korišćen je Laravel framework, Bootstrap, CSS, HTML i Javascript/jQuery.

### 1.3. Opis funkcionalnosti

- navigacioni meni se iščitava iz baze podataka, odnosno iščitavaju se dinamički kategorije u meniju po kojima se dalje filtriraju postovi
- dinamičko ispisivanje sadržaja iz baze podataka
- filtriranje objava po ukucanom tekstu sa paginacijom
- provera unetih podataka u formi
- mogućnost postavljanja i brisanja komentara
- mogućnost editora da menja, briše i postavlja nove vesti
- mogućnost administratora da menja, briše i dodaje nove korisnike i kategorije
- na admin sekciji pregled aktivnosti svih korisnika sa IP adresom, datumom, imenom, prezimenom i opisom aktivnosti (sa paginacijom) kao i sortiranje po datumu i filtriranje po aktivnosti

### 1.4. Template

Korišćen je [Technews](#) templejt od uiCookies.

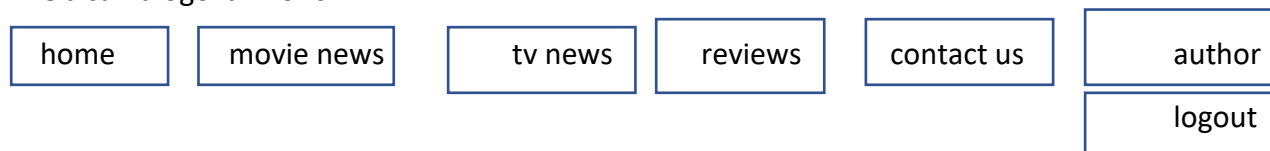

## 2. Organizacija

### 2.1. Organizacona šema

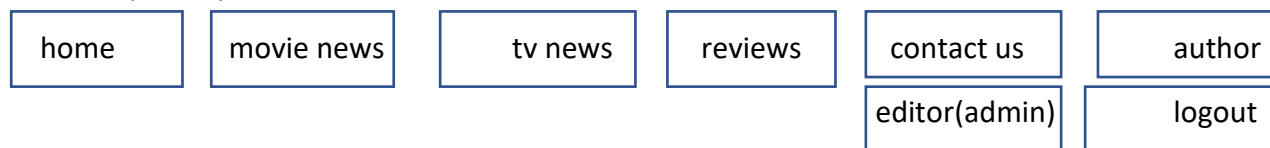

Neautorizovan korisnik

home	movie news	tv news	reviews	contact us	author

Could Joaquin Phoenix's Joker Crossover With The Batman? Here's What Director Matt Reeves Thinks

07 March 22 20:34

by: Admin Admin

Joker was a massive success when it hit theaters back in 2019, with Joaquin Phoenix earning an Academy Award for his portrayal of Arthur Fleck. Since then fans have been hoping for a sequel, and The Batman's release seemingly made the way for an awesome crossover event. Director Matt Reeves was recently asked about the potential of that pairing, responding honestly with: "I was finishing the Planet of the Apes movies when I first came on board [Batman], in 2017. It's been five years in the making. When I was working on the script, and got deep into the script, Joker hadn't come out yet. I didn't know what Joker was or what it was going to be". While there seems to be a connection between the two DC movies for fans, that's not necessarily the case for the filmmakers behind The Batman and Joker. Matt Reeves has been attached to his project about the Caped Crusader for years before Joker became a reality, so it was just never in the cards. While Marvel Studios is a stickler for serialized storytelling, Warner Bros. is allowing filmmakers to work with DC stories that aren't connected to the shared universe. This allows filmmakers like Todd Phillips and Matt Reeves to make bold narrative choices, without worrying about how it might affect the greater DCEU. In the same interview, the latter filmmaker further explained why a crossover is unlikely, saying: "I became aware of [Joker] once we were very deep into [The Batman], and the fact that they were grounding things in a way that was reminiscent of things that we were doing, that wasn't planned. Joker was always meant to be a very specific standalone that Joaquin and Todd were doing. There was never really any discussion of crossover". While Matt Reeves seemingly has a ton of ideas for his vision of Gotham City after The Batman, it doesn't seem to include a crossover with Joker. Instead, he'll be expanding the franchise with a spinoff series for HBO Max. As for The Batman's future on the big screen, that'll likely depend on how the movie performs at the box office now that it's in theaters. Fans are already theorizing about what a sequel might contain, and which villains might pop up.

Where Are Freydis & Harald Going At The End Of Vikings: Valhalla?

Upload an image

Old image:

No file selected.

Write your content

The finale of Vikings: Valhalla season 1 left viewers with the image of Freydis Eiríksdóttir (Frida Gustavsson) and Harald Sigurdsson (Leo Suter) departing from Kattegat, begging the question of where they're going. Vikings: Valhalla features a brand new set of Norse heroes, based on real Vikings warriors, jarls, and kings. Alongside Leif Eriksson (Sam Corlett), the aforementioned Freydis and Harald now feature as the show's primary protagonists.

            ->join('users as u', 'p.user_id', '=', 'u.id')
            ->get();
    }
}

```

### 3.2.5. Comment

```

<?php

namespace App\Models;

use Illuminate\Database\Eloquent\Factories\HasFactory;
use Illuminate\Database\Eloquent\Model;

class Comment extends Model
{
    use HasFactory;
    public function posts()
    {
        return $this->belongsTo(Post::class, 'post_id');
    }

    public function users()
    {
        return $this->belongsTo(User::class, 'user_id');
    }
}

```

### 3.2.6. Activity

```

<?php

namespace App\Models;

use Illuminate\Database\Eloquent\Factories\HasFactory;
use Illuminate\Database\Eloquent\Model;

class Activity extends Model
{
    use HasFactory;

    public function users()
    {
        return $this->belongsTo(User::class, 'user_id');
    }
}

```

## 3.3. Requests

### 3.3.1. CategoryDeleteRequest

```

<?php

namespace App\Http\Requests;

use Illuminate\Foundation\Http\FormRequest;

class CategoryDeleteRequest extends FormRequest
{
    /**
     * Determine if the user is authorized to make this request.
     *
     * @return bool
     */
    public function authorize()
    {
    }
}

```

```

{
    return true;
}

/**
 * Get the validation rules that apply to the request.
 *
 * @return array
 */
public function rules()
{
    return [
        'selectGTD' => 'required|numeric'
    ];
}

public function messages()
{
    return ['required' => 'Field not selected.', 'numeric' => 'Field not
selected.'];
}
}

```

### 3.3.2. CategoryInsertRequest

```

<?php

namespace App\Http\Requests;

use Illuminate\Foundation\Http\FormRequest;

class CategoryInsertRequest extends FormRequest
{
    /**
     * Determine if the user is authorized to make this request.
     *
     * @return bool
     */
    public function authorize()
    {
        return true;
    }

    /**
     * Get the validation rules that apply to the request.
     *
     * @return array
     */
    public function rules()
    {
        return [
            'secI' => 'required'
        ];
    }

    public function messages()
    {
        return [
            'required' => "No section name has been inserted."
        ];
    }
}

```

### 3.3.3. CategoryRequest

```

<?php

namespace App\Http\Requests;

```

```

use Illuminate\Foundation\Http\FormRequest;

class CategoryRequest extends FormRequest
{
    /**
     * Determine if the user is authorized to make this request.
     *
     * @return bool
     */
    public function authorize()
    {
        return true;
    }

    /**
     * Get the validation rules that apply to the request.
     *
     * @return array
     */
    public function rules()
    {
        return [
            'caid' => 'numeric',
            'secN' => 'required'
            //secN
        ];
    }

    public function messages()
    {
        return [
            'required' => "No new name inserted.",
            'numeric' => "Field not selected."
        ];
    }
}

```

### 3.3.4. ContactRequest

```

<?php

namespace App\Http\Requests;

use Illuminate\Foundation\Http\FormRequest;

class ContactRequest extends FormRequest
{
    /**
     * Determine if the user is authorized to make this request.
     *
     * @return bool
     */
    public function authorize()
    {
        return true;
    }

    /**
     * Get the validation rules that apply to the request.
     *
     * @return array
     */
    public function rules()
    {
        return [
            'email' => 'required|regex:/^\S+@\S+\.\S+$/ ',
            'subject' => 'required',

```

```

        'message' => 'required'
    ];
}

public function messages()
{
    return [
        'required' => "This field is required.",
        'email.max' => "Email is too long.",
        'email.regex' => 'Email is not in the right format.'
    ];
}
}

```

### 3.3.5. DeletePostRequest

```

<?php

namespace App\Http\Requests;

use Illuminate\Foundation\Http\FormRequest;

class DeletePostRequest extends FormRequest
{
    /**
     * Determine if the user is authorized to make this request.
     *
     * @return bool
     */
    public function authorize()
    {
        return true;
    }

    /**
     * Get the validation rules that apply to the request.
     *
     * @return array
     */
    public function rules()
    {
        return [
            'selectUTD' => 'required|numeric'
        ];
    }

    public function messages()
    {
        return ['required' => 'Field not selected.', 'numeric' => 'Field not selected.'];
    }
}

```

### 3.3.6. DeleteUserRequest

```

<?php

namespace App\Http\Requests;

use Illuminate\Foundation\Http\FormRequest;

class DeleteUserRequest extends FormRequest
{
    /**
     * Determine if the user is authorized to make this request.
     *
     * @return bool
     */
    public function authorize()

```

```

    {
        return true;
    }

    /**
     * Get the validation rules that apply to the request.
     *
     * @return array
     */
    public function rules()
    {
        return [
            'selectUTD' => 'required|numeric'
        ];
    }

    public function messages()
    {
        return ['required' => 'Field not selected.', 'numeric' => 'Field not
selected.'];
    }
}

```

### 3.3.7. PostCommentRequest

```

<?php

namespace App\Http\Requests;

use Illuminate\Foundation\Http\FormRequest;

class PostCommentRequest extends FormRequest
{
    /**
     * Determine if the user is authorized to make this request.
     *
     * @return bool
     */
    public function authorize()
    {
        return true;
    }

    /**
     * Get the validation rules that apply to the request.
     *
     * @return array
     */
    public function rules()
    {
        return [
            'comment' => 'required'
        ];
    }
}

```

### 3.3.8. PostRequest

```

<?php

namespace App\Http\Requests;

use Illuminate\Foundation\Http\FormRequest;

class PostRequest extends FormRequest
{
    /**
     * Determine if the user is authorized to make this request.
     *
     * @return bool
     */
}

```

```

    */
    public function authorize()
    {
        return true;
    }

    /**
     * Get the validation rules that apply to the request.
     *
     * @return array
     */
    public function rules()
    {
        return [
            'title' => 'required|regex:/^[\\S][\\s\\S]{1,99}$/',
            'image' => 'nullable|image',
            'content' => 'required|regex:/^[\\S][\\s\\S]*$/',
            'category' => 'required'
        ];
    }

    public function messages()
    {
        return [
            'category.required' => 'A post has to have a genre',
            'title.regex' => "Fill the title properly.",
            'image' => "Image isn't selected.",
            'content.regex' => "Fill the content properly."
        ];
    }
}

```

### 3.3.9. SelectRequest

```

<?php

namespace App\Http\Requests;

use Illuminate\Foundation\Http\FormRequest;

class SelectRequest extends FormRequest
{
    /**
     * Determine if the user is authorized to make this request.
     *
     * @return bool
     */
    public function authorize()
    {
        return true;
    }

    /**
     * Get the validation rules that apply to the request.
     *
     * @return array
     */
    public function rules()
    {
        return [
            'select' => 'required|numeric'
        ];
    }

    public function messages()
    {
        return [
            'required' => "Field not selected.",

```

```

        'numeric' => "Field not selected."
    ];
}
}

```

### 3.3.10. UpdateUserSelectRequest

```

<?php

namespace App\Http\Requests;

use Illuminate\Foundation\Http\FormRequest;

class UpdateUserSelectRequest extends FormRequest
{
    /**
     * Determine if the user is authorized to make this request.
     *
     * @return bool
     */
    public function authorize()
    {
        return true;
    }

    /**
     * Get the validation rules that apply to the request.
     *
     * @return array
     */
    public function rules()
    {
        return [
            'selectUTU' => 'required|numeric'
        ];
    }

    public function messages()
    {
        return ['required' => 'Select a user to update.', 'numeric' => 'Select a user to update.'];
    }
}

```

### 3.3.11. UserLoginRequest

```

<?php

namespace App\Http\Requests;

use Illuminate\Foundation\Http\FormRequest;

class UserLoginRequest extends FormRequest
{
    /**
     * Determine if the user is authorized to make this request.
     *
     * @return bool
     */
    public function authorize()
    {
        return true;
    }

    /**
     * Get the validation rules that apply to the request.
     *
     * @return array
     */
    public function rules()
    {

```

```

{
    return [
        'email' => 'required|max:255|exists:users,email|regex:/^\S+@\S+\.\S+$/ ',
        "password" => 'required|regex:/^\.{8,40}$/ '
    ];
}
//
public function messages()
{
    return [
        'required' => "The :attribute field is required.",
        'email.max' => "Email is too long.",
        'email.regex' => 'Email is not in the right format.',
        "email.exists" => "There is no user with this account.",
        'password.regex' => "Password must be be 8-40 characters long."
    ];
}
}

```

### 3.3.12. UserRegisterRequest

```

<?php

namespace App\Http\Requests;

use Illuminate\Foundation\Http\FormRequest;

class UserRegisterRequest extends FormRequest
{
    /**
     * Determine if the user is authorized to make this request.
     *
     * @return bool
     */
    public function authorize()
    {
        return true;
    }

    /**
     * Get the validation rules that apply to the request.
     *
     * @return array
     */
    public function rules()
    {
        return [
            'fname' => 'required|max:30|regex:/^[A-ZČČŽŠĐ][a-zččžšđ]{1,29}$/ ',
            'lname' => 'required|max:30|regex:/^[A-ZČČŽŠĐ][a-zččžšđ]{1,29}$/ ',
            'email' => 'required|max:255|unique:users,email|regex:/^\S+@\S+\.\S+$/ ',
            "password" => 'required|regex:/^[A-z0-9]{8,40}$/ '
        ];
    }
}

//
public function messages()
{
    return [
        'required' => "This field is required.",
        'fname.regex' => 'Name format is incorrect.',
        'fname.max' => 'Name is too long, max 30 characters.',
        'lname.regex' => 'Last name format is incorrect.',
